BREED NOTES – SELKIRK REX

There are no separate BCS codes for SH carrying LH. Use the SH breed code (56) when registering a litter from a SH X LH breeding.

Cinnamon & Fawn are not accepted colors. These colors may NOT appear in the background of the cat to be registered. This per 6/21/06 email from Patricia Simmes (BCS). The reason cinnamon and fawn are not allowed is because those colors originated in Germany due to Abyssinian outcrossing, which is not an allowable outcrossing breed.

Red tabby pattern may or may not be visible in red areas of CALICO – permitted.
