Males are generally larger than females.

EYES: Shape is round to oval. Large, but not bugged. Set wide apart, with a slight bias toward the base of ear, when oval in shape. Eye color independent of coat color, except in the Lynx Points, where Blue is the only acceptable color. Richness and depth of color is always preferred.

NECK: Thick and muscular, long in proportion to the body.

BODY: Long and substantial, muscular, particularly the males. Hindquarters slightly higher than shoulders.

ROSETTED/SPOTTED TABBY PATTERN: Rosettes and spots shall be random, with a horizontal flow to their alignment, and a pattern like no other breed. Ground color should be clear, and free of ticking. Contrast with ground color must be extreme, showing distinct pattern with sharp edges. Rosettes are two toned, with dark outlines, and a lighter center. Rosettes can be many different shapes, such as round donut, open donut, pancake, paw print, arrowhead, or clustered, and are preferred to single spotting. Strong, bold chin strap and mascara markings desirable. Backs of ears have a thumbprint. Color on chest and belly should be lighter than ground color. Blotchy horizontal shoulder streaks, spotted legs, and spotted, or rosetted tail are desirable. Belly must be spotted. Allowance for spotted pattern without rosettes. These cats are not required to have two tone markings.

MARBLE TABBY PATTERN: The Marble pattern is full of swirls, with a pattern like no other breed. Ground color should be clear, and free of ticking. There should be no resemblance to the Classic Tabby pattern, and a circular pattern or bullseye is undesirable. The more random the pattern, the better. Additional color tones inside the pattern, giving a “stained glass” effect is desirable. Patterned shoulder markings, and multi-toned markings on legs and tail desirable. Rosettes and spots can be present, particularly on the legs. Strong chin strap, mascara markings desirable. Backs of ears have a thumbprint. GENERAL: The Bengal is a medium to large, patterned, short-haired cat with a muscular build, and a thick tail carried lower than the back. The Bengal should have the appearance of a non-domestic (wild) cat. The distinctive rosetted (including spotted) and marbled patterns,

facial markings, coupled with a long, athletic body and a head structure distinct from other domestic cats contribute to the look and feel. Bengals are alert and active, with inquisitive, dependable dispositions. Males are generally larger than females.

HEAD: Broad, modified wedge with rounded contours, longer than wide, with high cheekbones. Slightly small in proportion to body, not to be taken to extreme. From the top skull to the neck is a continuous curve, with visible back skull. No flat planes.

PROFILE: Bridge of nose extends above the eyes. Profile line extends from nose bridge to nose tip, making a slight, to nearly straight, concave curve with no break.

NOSE: Large and wide, with pronounced nose leather.

CHIN: Strong, substantial, aligns with tip of nose in profile.

MUZZLE: Full and broad, with prominent whisker pads.

DISQUALIFY: Belly not patterned. Any distinct locket. Visible tail fault. Cow hocking. Crossed eyes. Any red, cream, tortie, torbie, bi-color, or classic tabby.

BENGAL PATTERNS AND COLORS

ROSETTED/SPOTTED TABBY PATTERN: Two-toned rosettes or spots shall be random or aligned with a horizontal flow. Contrast with ground color must be extreme, showing distinct pattern with sharp edges. Rosettes (which are preferred) and spots may be many different shapes, with preference to patterns reminiscent of non-domestic (wild) patterned cats. Distinct mascara and other facial markings. Lighter colored, preferably white, spectacles enhance the eyes. A much lighter to white ground color on the whisker pads, chin, chest, belly, and inner legs, in contrast to the ground color of the flanks and back. Chin strap and necklaces desirable. Light thumbprints on back of ears are desirable. Blotchy horizontal shoulder streaks, spotted legs, feet and tail, are preferred over stripes. Belly must be patterned.

MARBLE TABBY PATTERN: The Marble pattern is a modified classic tabby pattern with horizontal, diagonal, or random pattern flow, as opposed to a circular pattern flow; there should be no resemblance to the classic tabby pattern seen in other breeds. Contrast with ground color must be extreme, showing distinct markings with sharp edges. Two toned markings are preferred. Additional color tones inside the pattern, giving a "stained glass" effect are desirable. Patterned shoulder markings and multi-toned markings on legs, feet and tail desirable. Distinct mascara and other facial markings. Lighter colored, preferably white, spectacles enhance the eyes. A much lighter to white ground color on the whisker pads, chin, chest, belly, and inner legs, in contrast to the ground color of the flanks and back. Light thumbprints on back of ears are desirable. Belly must be patterned.

CHARCOAL TABBY PATTERN EFFECT: Rosetted/Spotted or Marble Pattern. Charcoal Tabby Effect can be present and shown in all acceptable tabby patterns and colors (e.g., Black Silver Charcoal Spotted Tabby). Any color Charcoal Tabby meets the Rosetted/Spotted or Marbled Tabby descriptions with the following differences: Less contrast between pattern and background, with the overall appearance in between a tabby and a solid. White to cream, spectacles or "goggles" encircle the eyes. Dark mask runs from the nose bridge to the nose and connects from the mascara lines to the nose bridge. Wide, dark, "cape" on dorsal side.

ROSETTED/SPOTTED TABBY AND MARBLE TABBY COLORS:

BROWN (BLACK) TABBY: All variations of brown tabby are allowed, ranging from very cool to warm toned. Ground color ranges from cold or grey-beige to warm tan and copper brown. Markings black to dark brown. Skin pigment around eyes, lips and nose is black. Black tail tip. **Nose leather:** brick to black. **Paw pads:** black.

COAT LENGTH: Longhair.

PATTERN AND COLOR: Any solid (melanistic), charcoal, marble or rosetted/spotted tabby in colors allowed for registration.

RATIONALE: The proposed revised standard reflects the consensus of the 2017 Breed Committee with additional input from some 2018 incoming Council members. It removes redundant verbiage (Current Standard is 10 pages; Revised Standard is 3.5 pages), combines same information in same section of standard, balances point allocation, aligns descriptions similarly to other breed standards, and incorporates comments from Judges and the Breeds & Standards Committee. The proposed revised standard restores many color and pattern combinations inadvertently omitted from the current standard, enabling their registration. The 2018 proposed revised standard builds from the failed 2017 proposal and incorporates the feedback received on the 2017 version. Of note, the 2018 proposal restores the prominence of Rosettes and the preference for glitter. Where there is continued disagreement between Breeders, separate questions have been created to address these differences of opinion. For ease of understanding, the full text of the Proposed Final Standard, is also provided for each question. If there are inconsistencies between the strikethrough and the clean text, the clean text controls.

RATIONALE: Many lynx point kittens have lighter markings because of the temperature sensitive mutation that restricts pigment at warmer temperatures. Lynx points are born white or nearly white and it can take months for pattern color equivalent to brown tabbies to

develop. This question polls the Council on whether this should be an allowance in the standard.

5. **IF #1 PASSES, PROPOSED:** Remove preference for “white” in certain pattern elements described as “light.”

Current:

ROSETTED/SPOTTED TABBY PATTERN: Rosettes and spots shall be random, with a horizontal flow to their alignment, and a pattern like no other breed. Ground color should be clear, and free of ticking. Contrast with ground color must be extreme, showing distinct pattern with sharp edges. Rosettes are two toned, with dark outlines, and a lighter center. Rosettes can be many different shapes, such as round donut, open donut, pancake, paw print, arrowhead, or clustered, and are preferred to single spotting. Strong, bold chin strap and mascara markings desirable. Backs of ears have a thumbprint. Color on chest and belly should be lighter than ground color. Blotchy horizontal shoulder streaks, spotted legs, and spotted, or rosetted tail are desirable. Belly must be spotted. Allowance for spotted pattern without rosettes. These cats are not required to have two tone markings.

MARBLE TABBY PATTERN: The Marble pattern is full of swirls, with a pattern like no other breed. Ground color should be clear, and free of ticking. Contrast with ground color must be extreme, showing distinct markings with sharp edges. Markings are two toned, having a horizontal or diagonal flow. Side pattern symmetry not required. There should be no resemblance to the Classic Tabby pattern, and a circular pattern or bullseye is undesirable. The more random the pattern, the better. Additional color tones inside the pattern, giving a “stained glass” effect is desirable. Patterned shoulder markings, and multi-toned markings on legs and tail desirable. Rosettes and spots can be present, particularly on the legs. Strong chin strap, mascara markings desirable. Backs of ears have a thumbprint. Color on chest and belly should be lighter than ground color. Belly must be patterned. Allow for maturity for “stained glass” or full coloration to appear.
