

## RULES OF REGISTRATION

**BREED NAME:**

**BALINESE-JAVANESE**

**ALLOWABLE OUTCROSS BREEDS:**

Balinese	Colorpoint Shorthair
Siamese	Pointed Oriental LH or OLH carriers 4### series on litters born on or before 12/31/2025 (excluding Pointed and white)
Javanese	Pointed Oriental 4### series with DOB on or before 12/31/2025 (excluding Pointed and white)

**BREED CODES:**

07 – Standard			
71 – Outcross			

**PEDIGREE REQUIREMENTS (last date showing is current):**

Date: unknown	8 generations	Date: 2/06	3 generations for 1280-series only
Date: 2/05	5 generations for 1200-series only	Date: 2/08	5 generations for 1270/20-series only
Date: 2/08	3 generations for 40## series only		

**FOREIGN-CAT REQUIREMENTS (if different from above):**

Date:	
Date:	

**REGISTER AS AOV:**

Shorthair	
(02/08) Cinnamon Lynx Point	(02/08) Cinnamon Tortie Lynx Point (inc. Smoke & Silver)
(02/08) Fawn Cream Lynx Point (inc. Smoke & Silver)	(02/08) Fawn Lynx Point (inc. Smoke & Silver)

**DO NOT ACCEPT (cat to be registered or cats in background):**

(02/13): effective 07/15/13 no litters from OLH and LH carriers bred to Siamese, CPSH or any pointed Oriental			

**SIGNIFICANT ACCEPTANCE DATES:**

Registration:	Effective: 9/66
Provisional: 9/66	Effective: 1/67
Championship: 2/70	Effective: 5/70
Merge Balinese and Javanese	Effective: 05/08

**BCS CODE SERIES:**

1270 series (standard) cats with minimum 5 generations seal/blue/chocolate/lilac ancestry	40## series (outcross breedings) Javanese division cats with CPSH or OLH ancestry
1280 series (outcross breedings)	
20## series (standard) cats with minimum 5 generations pointed to pointed ancestry	

## REGISTRATION PREFIXES (COLORS): BALINESE

## BREED NOTES

### BREED: BALINESE Division

**Per THD (3/04) – For the purposes of genetics, Balinese is a longhair. When bred to a longhair (any breed), shorthair kittens are not possible.**

**If both parents are Siamese and one or more kittens in the litter is a longhair, the litter should be registered as Siamese and the longhair kittens registered as Balinese.**

**First generation breeding of a Balinese to a Siamese will always produce only shorthairs.**

### 2004 Breed Council Ballot:

**Through birthdate 12/31/2010 - Permit the breeding of 1270-series Balinese to AOV Javanese and to AOV 4000-series Orientals (LH and LHC) of appropriate color (seal point, blue point, chocolate point,**

and lilac point). The offspring will receive a unique identifier. 1<sup>st</sup> generation offspring are especially encouraged to be offspring of a breeding to 1270-series Balinese or Siamese.

Permit re-registration of 1280-series Balinese with a minimum of 5 generations acceptable colors (seal point, blue point, chocolate point, and lilac point) into the 1270-series Balinese codes.

#### JAVANESE division

Cinnamon point and fawn point accepted as AOV 2/04.

#### EFFECTIVE 2/04 THE FOLLOWING:

##### **Outcrossing to 5200-5300 series Colorpoint SH allowed under the following conditions:**

- a. 5200 and 5300 series Colorpoint SH will be treated identically under this proposal. No distinctions or restrictions are made regarding cinnamon and silver (ancestry) due to that fact that it has been determined that these genes have always existed within our breed.
- b. Javanese descendants of 5200-5300 series Colorpoint SH will be identified by a separate "breed code" to indicate Oriental ancestry. 4000 series has been confirmed available and is suggested for this purpose.
- c. All longhair 4000 series Javanese of accepted championship colors will have full show status.

##### **Javanese be allowed to outcross to Pointed 4100-4200-4300-4400 series Orientals (excluding pointed and white) under the following conditions:**

- a. One parent (of litter) must be Javanese. We feel it reasonable to request this restriction as our standard outcrosses: Siamese, Balinese, Colorpoint SH, as well as the Javanese itself are accepted Oriental outcrosses - increasing the possibility of confusion during litter registration. A Javanese parent would confirm the intent of the breeder to produce a Javanese litter. In any event the offspring of 2 Pointed Orientals would NEVER be registerable as Javanese.
- b. Resulting offspring are to be identified by a separate "breed code" to indicate Oriental ancestry. 4000 series has been confirmed available and is suggested for this purpose.
- c. All longhair 4000 series Javanese of accepted championship colors will have full show status.
- d. Addition of Oriental LH as an allowable outcross should be noted in the Rules of Registration - Article III, Section 3, Item 4: following Javanese \*\* (Certain limited outcrossing is permissible to the Oriental LH.)

#### Effective 02/08

- **127#** "historical" Balinese series, to be reserved for cats with minimum of 5 generations Seal/Blue/Chocolate/Lilac Point ancestry
- **20##** "historical" Javanese series, to be reserved for cats with a minimum of 5 generations pointed to pointed ancestry.
- **40 ##** hybrid Javanese series approved 2/2004, indicates Javanese with 5### CPSH or Oriental LH ancestry.
- **128#** hybrid Balinese series approved 2/2005, indicates Balinese with Javanese or Oriental LH ancestry.

Transferred animals of appropriate color and coat length would be eligible for championship competition.

#### Hybrids:

**Balinese Javanese:** Balinese, Javanese, Colorpoint Shorthair, Siamese or Oriental Longhair\*.

(\*Certain limited outcrossing is permissible to the Oriental Longhair on litters born on or prior to 12/31/2010 -- contact the CFA Central Office for details).

#### Section 4 - Mutations:

**Balinese:** Balinese, Siamese, Javanese\* or Oriental Longhair\*. (\*Certain limited outcrossing is permissible to the Javanese or Oriental Longhair, contact the CFA Central Office for details).

**b) Breedings between Balinese, Javanese, Siamese and Colorpoint SH (traditional outcrosses):**

- Offspring resulting from a 127# and 20##/40## breeding should be assigned the 20/40## identifier (according to the “Javanese” parent). Seal/Blue/Chocolate/Lilac Points are to be registered as Balinese, all other colors as Javanese.
- Offspring resulting from a 128# and 20##/40## breeding should be assigned the 40## identifier. Seal/Blue/Chocolate/Lilac Points are to be registered as Balinese, all other colors as Javanese.
- Offspring resulting from breedings to Siamese should be treated as before, the offspring to be assigned the same identifier as the Balinese/Javanese parent (127#/128#/20##/40##).
- Seal/Blue/Chocolate/Lilac Points are to be registered as Balinese, all other colors as Javanese.
- Offspring resulting from breedings to Colorpoint SH should be treated as before, the offspring to be assigned the 20## identifier except where one parent carries an identifier indicating Oriental ancestry (128#/40##/5###) in which case the offspring should be assigned the 40## identifier. Seal/ Blue/ Chocolate/ Lilac Points are to be registered as Balinese, all other colors as Javanese.

**c) Limited outcrossing to 4### series Orientals:**

- 2004 Ballot - approved at 2005 BOD meeting: Permit breeding of 127# series Balinese to AOV Javanese and to AOV 4### series Orientals (LH and LHCarrier) of appropriate color (Seal/Blue/Chocolate/Lilac Point), offspring to receive a unique identifier. (cutoff - DOB 12/31/2010).
- 2003 Ballot - approved at 2004 BOD meeting (greatly summarized): Permit breeding of any Balinese or Javanese to Pointed 4### series Orientals (excluding pointed and white). Resulting offspring to be registered using the 40## identifier to indicate Oriental ancestry. Seal/Blue/Chocolate/Lilac Points are to be registered as Balinese, all other colors as Javanese. (cutoff - DOB 12/31/2010)

**d) Transfer via Certified Pedigree:** 2005 Ballots – approved at Feb 2006 BOD meeting: Permit registration via 3 generation certified pedigree. Cats to be registered using the 40## identifier. Seal/Blue/Chocolate/Lilac Points are to be registered as Balinese, all other colors as Javanese. (cutoff - none) 5 generation certified pedigree will still be required for 127#/20## transfers. Seal/Blue/Chocolate/Lilac Points to be registered as Balinese, all other colors as Javanese.

**e) Inter-registry Transfer:** 2004 Ballots - approved at 2005 BOD meeting. It was agreed that a correction fee would be appropriate.

- Permit re-registration (inter-registry transfer) of 128#, 20##, 40## series Balinese with a minimum of 5 generations acceptable colors (Seal/Blue/Chocolate/ Lilac Point) as 127#series Balinese. (no cutoff date)
  - Permit re-registration (inter-registry transfer) of 40## series Javanese with a minimum of 5 generations acceptable colors (all pointed, no bi-colors) as 20## series Javanese. (no cutoff date)
- Seal /Blue/Chocolate/Lilac Points with “Javanese” numbers to cats transferable to 127# Balinese

**Effective 02/09**

Permit breeding of any Balinese or Javanese to Pointed 4### series Orientals (excluding pointed and white). Resulting offspring to be registered using the 40## identifier to indicate Oriental ancestry. Seal/Blue/Chocolate/Lilac Points are to be registered as Balinese, all other colors as Javanese-Balinese. (cutoff - DOB 12/31/2015)

**Effective 02/13**

*Note that at this time it is impossible to register any Balinese x Oriental litters online. In order to facilitate this process and simplify things for CFA Central Office staff, these litters should default to ORIENTAL. Only if the breeder specifically asks that the litter be registered as Balinese and the Oriental parent qualifies under the guidelines previously documented for Balinese x Pointed Oriental longhair, longhair carrier breedings should the litter be processed as BALINESE.*
