GENERAL: the Scottish Fold cat occurred as a spontaneous mutation in farm cats in Scotland. The breed has been established by crosses to British Shorthair and domestic cats in Scotland and England. In America, the outcross is the American and British Shorthair. All bona fide Scottish Fold cats trace their pedigree to Susie, the first fold-ear cat discovered by the founders of the breed, William and Mary Ross.

HEAD: well rounded with a firm chin and jaw. Muzzle to have well rounded whisker pads. Head should blend into a short neck. Prominent cheeks with a jowly appearance in males.

EYES: wide open with a sweet expression. Large, well rounded, and separated by a broad nose. Eye color to correspond with coat color. Blue-eyed and odd-eyed are allowed for all white and bi-color and van patterns.

NOSE: nose to be short with a gentle curve. A brief stop is permitted. Profile is moderate in appearance.

FOLDED EARS: fold forward and downward. Small, the smaller, tightly folded ear preferred over a loose fold and large ear. The ears should be set in a caplike fashion to expose a rounded cranium. Ear tips to be rounded.

STRAIGHT EAR: Ears to be medium to small with rounded tips. They are set well apart to show a rounded cranium.

BODY: medium, rounded, and even from shoulder to pelvic girdle. The cat should stand firm with a well padded body. There must be no hint of thickness or lack of mobility in the cat due to short, coarse legs. Toes to be neat and well rounded with five in front and four behind. Overall appearance is that of a well rounded cat with medium bone; fault cats obviously lacking in type. Females may be slightly smaller.

TAIL: tail should be medium to long but in proportion to the body. Tail should be flexible and tapering which may end in a round tip. Longer, tapering tail preferred.

COAT (SHORTHAIR): dense, plush, even. Short to medium-short in length. Soft in texture. Full of life. Standing away from body due to density, not flat or close lying. Coat texture may vary due to color and/or regional/seasonal changes.

COAT (LONGHAIR): medium-long to long hair length. Full coat on face and body desirable but short hair permissible on face and legs. Britches, tail plume, toe tufts, and ear furnishings should be clearly visible with a ruff being desirable. Seriously penalize: cotty coat, except in kittens.

AOV: straight ear.

PENALIZE: brow ridge.

DISQUALIFY: kinked tail. Tail that is foreshortened. Tail that is lacking in flexibility due to abnormally thick vertebrae. Splayed toes, incorrect number of toes. Any evidence of illness or poor health. Palpable nose break.
