## BREED NOTES

### BREED: SOMALI

The red and fawn (dilute of red) in this breed are not really red and fawn in the same way as red and cream are in other breeds. So, when blue is bred to fawn, ruddy to red, blue-cream females will not occur. The genetics program is not coded properly. A code 9 comes up, which should be disregarded.

(02/22) Change color RED (cinnamon gene) to CINNAMON
